## EXPERIENCE

### Software Engineering Intern

*10xEvolve | May 2020 – Mar 2021*

- 10xEvolve is a startup that follows Pivotal Methodology bringing together agile, lean, collaborative, and iterative approaches to its culture
- As an intern, I am a junior developer responsible for building 10xEvolve's website, a custom email service and the authentication component of the app
- Among the technologies and practices that I am being trained are: TypeScript | React | SASS | Node | Express | GCP | Pair programming | TDD

### Web Developer - WordPress

*Settlement Services International | Jul 2020 – Jan 2021*

- SSI is an NGO that helps new Australian immigrants to start-up their businesses
- I built eight websites and e-commerce sites for different clients which were selling products and services such as upcycled furniture, books, personal training, paitings, and more
- WordPress, HTML, CSS, WooCommerce, Themify, WPBakery and a wide range of plugins were used to build those websites

### Software Engineering Student

*General Assembly | Aug 2019 – Feb 2020*

- Learned languages and frameworks such as HTML/CSS | JavaScript | React | Node.js | jQuery | Express | Ruby on Rails | SQL/Postgres | Github
- Developed four projects using these technologies including Expenses Track App, Tic Tac Toe Game, Givings (a gift list management app), and MockedIn (a version of LinkedIn to help recruiters, career coaches and candidates to improve their profiles)

### Banking Technician

*CAIXA Federal Bank, São Paulo | May 2013 – Jul 2016*

- Operated multiple internal banking software and reporting results to the managing team
- Responsible for customer service and complex problem-solving
- Focused on home loans, creating and maintaining partnerships, and sales

## ACADEMIC HISTORY

### Bachelor of IT - Mobile App Development

*Academy of Information Technology (AIT) | Jul 2020 –*

- Completed Introduction to Web Development (HTML, CSS, Design and Planning), C++ 1, Foundation Programming and Information Systems
- Achieved High Distinction in all completed subjects

### Software Engineering Immersive

*General Assembly | Aug 2019 – Feb 2020*

- Intensive web development bootcamp focused on acquiring problem-solving skills
- Developed four projects, two individually and two team projects
- Learned a variety of languages, frameworks, and technologies used in the industry, such as HTML, CSS, JS, jQuery, Bootstrap, Ruby on Rails, React, Express, Node.js, MongoDB, SQL, Postgres, Github, and Heroku

### English Language

*ILSC | Aug 2016 – Feb 2017*

- International experience to learn English started as a beginner
- Achieved Upper-Intermediate level
